Office Action Summary

Restriction to one of the following inventions is required under 35 USC 121:

Group I, claims 1-9 drawn to a container for storing bananas, classifiable in class 428, subclass 34.1 plus;

Group II, claims 10-20 drawn to a sealed package containing bananas, classifiable in class 426, subclass 106.

The inventions are distinct, each from the other, because the container Group I could be used to package products other than bananas as claimed in Group II. For example, the container of Group I could be used to package other produce, other foods other than produce or even non-edibles. Also, the sealed package of Group II does not require the specific container of Group I. For example, the sealed package of Group II does not require a container that has an oxygen permeability of at least 700 ml/atm and an ethylene permeability of at least 3 times.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication from the examiner should be directed to Steven Weinstein whose telephone number is (703) 308-0650. The examiner can generally be reached on Monday-Friday from 7:00 a.m. to 3:30 p.m..

Art Unit: 1761
